

Why Network Designs?

In this Age of Information, it's the small firm that leads the way toward technological change and productivity—through experimentation and innovation.

Network Designs is a small, IT services provider. We turn new technologies into enterprise solutions.

Being SMALL has its advantages.

We're **AGILE**.

Anyone can test new technologies. But we turn them into solutions overnight.

We're **QUICK**.

Fast response matters to us, because it matters to you.

We're **DESIGNERS**.

We unify disparate technologies into perfected solutions.

We're **SMART**.

Like the IT solutions we provide.

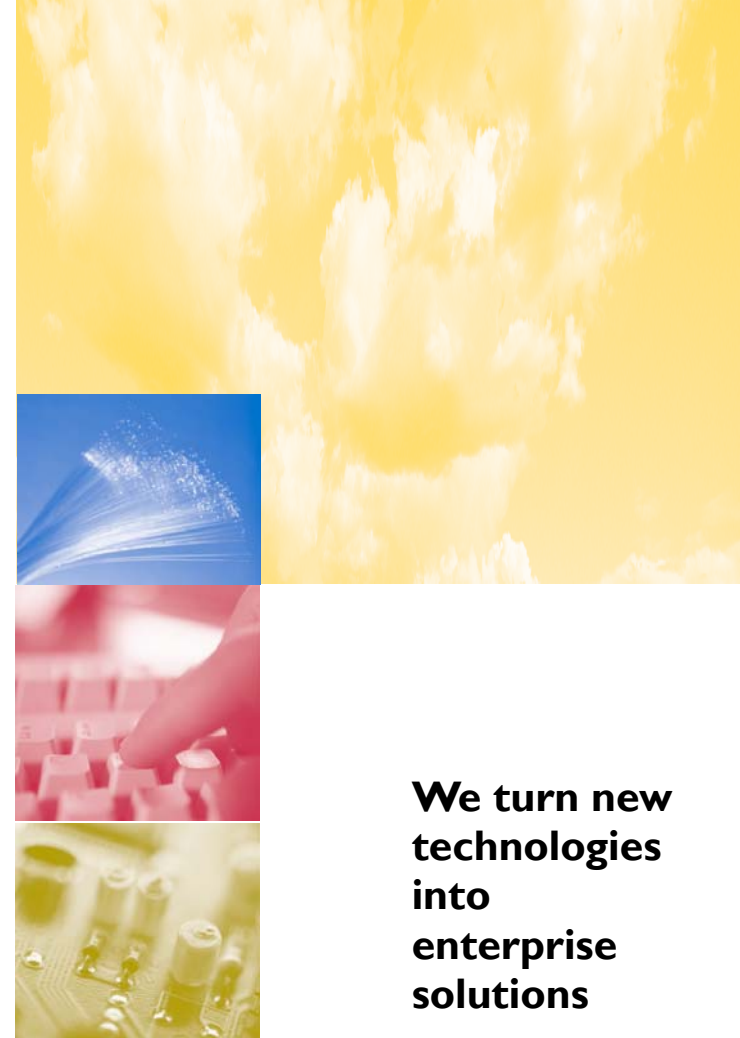

A **women-owned** business, Network Designs holds GSA Schedules, a Department of Commerce GWAC COMMITS contract, and multiple BPAs with the Federal Aviation Administration and with NAVFAC for IT services.

For more information, contact **Nancy Pierce**, Director of Business Development, at 703.268.0030 or visit www.netdes.com.

**We turn new
technologies
into
enterprise
solutions**

Network Designs strives continually to turn emerging technologies into enterprise solutions.

Do you need the latest technology solutions delivered quickly?

Our customers have unique information technology (IT) problems that require next-generation IT solutions. To respond quickly to our customers, we strive continually to turn emerging technologies into enterprise solutions.

For over a decade, we have practiced and honed our technical skills in network design and integration; software applications development; and information assurance, implementing successful solutions for government, military, and commercial customers.

Network Design & Integration

Network Designs integrates the leading and latest technologies for our customers' enterprise solutions. To provide preferred service and technology expertise to our customers, we are an Authorized Verint Integrator, a Cisco Premier Certified Partner, a Microsoft Certified Partner, a Symantec Certified Security Partner, and a TANDBERG Premier Partner.

Network Designs provides integration and support in the following areas.

- Call Centers
- Desktop-Managed Upgrades
- LAN, WAN, MAN, Wireless
- Network Connectivity Solutions
- Network Operations Center
- Seat Management
- Wireless Networking Solutions

Software Applications Development

Network Designs has built its reputation on its expertise in delivering successful networking applications solutions for its customers.

We apply a mature approach toward applications development: from identifying agency business goals to implementing analysis, design, development, and quality assurance. Our collaborative, joint-development approach with information owners, stakeholders, and end-users, ensures that our customers are satisfied with our solutions.

Our applications development experience extends from customer-specific Web portals, to government agency Web sites, to enterprise networked database systems, to a cross-agency government information sharing infrastructure.

- Customer Relationship Management
- Customer Video Portal: ShowSpeakers.com™
- Customer Web Portal: CustomerNetSM
- Database Applications Development
- Web Solutions & Section 508

Information Assurance

Network Designs implements a range of information assurance solutions for our customers. Through a management practice that oversees every aspect of strategic, tactical, and operational work needed to maintain a secure enterprise, we protect critical components of the government information infrastructure from security threats, as required by FISMA.

Our offerings include—

- Anti-Cyber Terrorism / Forensics
- CCTV Surveillance Design & Networking
- Certification & Accreditation
- Data & Physical Security
- FISMA
- Penetration Testing
- Risk Assessment
- Security Operations Center
- Security Policy
- Web Streaming Video
