

The Loronix System Advantage

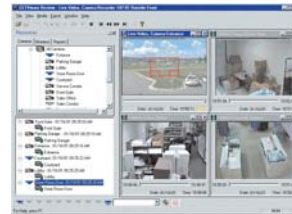

“ How intelligent is your video? ”

Preparing your future with the innovations of today, Loronix Information Systems, Inc. brings intelligence to your video. Loronix CCTVware software provides effective, superior management, and a proactive approach to your Networked Digital Video Management System (NDVMS). New configurations of Loronix CCTVware offer users up to eight weeks of storage on hard disk, with the option of a tape library for virtually unlimited storage. New features and functions make it the easiest and most effective video management tool offered to date.

Benefits include:

- Improved Image Quality at 720 x 486 NTSC resolution and 720 x 576 PAL resolution
- Intelligent Disk Management
- Temporal Wavelet - Reduces Storage Requirements by 10-60% Depending on System Configuration
- Variable Sensitivity Activity Detection
- Easy Integration of Third Party Point of Sale and Access Control Systems with Software Development Kit
- Remote Troubleshooting, Configuration, System Health Monitoring, and Notification

Review Application

CCTVware Review™ allows the user to view live and recorded video. Requesting video is easy and intuitive by using simple drag-and-drop and mouse-click commands.

- Multi-Camera View
- Remote Viewing
- Multi-Video Output

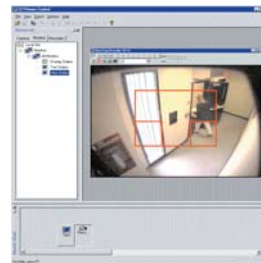

Alarm Review Application

CCTVware Alarm Review™'s graphical interface allows the user to view live and recorded video in response to an alarm, without interrupting the recording process. Active and historical alarms are reviewed with the same look and feel in the Review Application, minimizing the learning curve.

- Alarm Details
- Instant Alarm Review
- Multiple Alarm Review

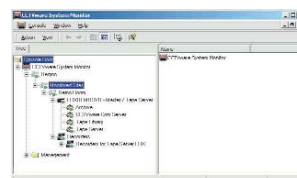

Control Application

CCTVware Control™ allows the user to effortlessly control cameras and view live video.

- PTZ Camera Control
- Monitor Control
- Multi-Video Outputs

System Monitor

CCTVware Systems Monitor™ enables the system administrator to efficiently monitor system functions and manage system services from a single workstation. As well as receive system monitoring alerts, via email.

Extended Storage Recorders

- Recorders simultaneously capture up to 7.5 fps NTSC, 6 fps PAL across all inputs or up to 15 fps NTSC, 12 fps PAL on selected inputs
- Enterprise M Series recorders are available in 8, 16, and 32 input configurations with up to 8 weeks of disk storage, and are scalable to an unlimited number of camera inputs
- Remote Series recorders allow local storage, worldwide video streaming, and camera control over LANs, WANs, and the Internet
- Remote Series recorders are available in 8 and 16 input configurations with up to 8 weeks of disk storage

Extended Storage Recorder

Temporal Wavelet Compression

- Temporal Wavelet is a Loronix patent pending software algorithm that significantly reduces the bandwidth and storage requirements for digital video, without sacrificing the superior picture quality of today's wavelet compression

Model Number	# of Camera Inputs	Video Storage (GB)	*1 ips	*3.75 ips
Remote 830	8	30	5 days	1 day
Remote 890	8	90	2 weeks	3.5 days
Remote 8185	8	185	4 weeks	7 days
Remote 8375	8	375	8 weeks	14 days
Remote 1650	16	50	4 days	1 day
Remote 16185	16	185	2 weeks	3.5 days
Remote 16375	16	375	4 weeks	7 days
Enterprise M-Series 830	8	30	5 days	1 day
Enterprise M-Series 8185	8	185	4 weeks	7 days
Enterprise M-Series 8375	8	375	8 weeks	14 days
Enterprise M-Series 1660	16	60	4 days	1 day
Enterprise M-Series 16375	16	375	4 weeks	7 days
Enterprise M-Series 3260	32	60	4 days	1 day
Enterprise M-Series 32375	32	375	2 weeks	4 days

*Assuming 9KB frame size with Temporal Wavelet compression, 24 hours a day, 7 days a week

Tape Library

Increase Storage Time with Loronix Tape Libraries

- Capacities range from 500 GB to 30 TB, in self-contained units holding up to 600 cartridges
- Automated long-term video storage, requires no human intervention
- Retrieve video in minutes
